Issue 6

There was someone before you

Hi and here's to the best day! Go outside, turn off everything you can and listen to the sounds around you. You'll hear birds, the freeway noise, wind in the trees, barking dogs, cars, power tools sometimes, maybe your refrigerator, the jingle of a dog's collar when it jumps off of the couch. It's the sound of real life.

A Guest Advice, by Dom Deluise

If you type a scathing letter to someone don't send it unless it's perfect in grammar. Anything less will be viewed as complete garbage and laughed at all the way home. "If you can't figure a way to have it done right, don't do it at all.", says switch blade typing instructor, Gerald Balding. "These things [poorly crafted hate letters] come through all the time, usually right before lunch", he looks down while smirking, "and I have to admit, it gives the person on the receiving end a big smile on the face. The junk letters have their place, but not in the intended manner, to say the least."

From a distance
I walked side by side with a cat.
Each with purpose
but for different reasons.
